Use of Non-GAAP Financial Measures

To provide investors with additional information regarding our financial results, we are disclosing herein non-GAAP net income (loss) and net income (loss) per share and adjusted EBITDA, each of which are non-GAAP financial measures used by our management to understand and evaluate our core operating performance and trends. We believe that these non-GAAP financial measures provide useful information to investors and others in understanding and evaluating our operating results, as they permit our investors to view our core business performance using the same metrics that management uses to evaluate our performance. Nevertheless, our use of these non-GAAP financial measures has limitations as an analytical tool, and investors should not consider these measures in isolation or as a substitute for analysis of our results as reported under GAAP. Instead, you should consider these measures alongside GAAP-based financial performance measures, net income (loss), various cash flow metrics, and our other GAAP financial results.

Set forth below are reconciliations of these non-GAAP financial measures to their most directly comparable GAAP financial measures. These reconciliations should be carefully evaluated.
